**PORTFOLIO OBJECTIVE**

The objective of the portfolio is to seek, through a combination of capital growth and income, returns above the IA Flexible Investment Sector (although the investment constraints of this sector do not apply). By adopting an investment policy using a wide range of assets and actively avoiding areas which could be deemed overvalued, a significant strength of the portfolio is the range of opportunities in which it can invest. The portfolio aims to select from a range of collective investment schemes offering capital growth with volatility comparable to the IA Flexible Investments sector. The portfolio's ability to access equities, fixed interest stock and currencies from across world markets provides the high degree of flexibility needed to achieve the investment objective.

**ASSET ALLOCATION**

IAM 7 1.19

The value of an investment and the income from it can fall as well as rise and investors may get back less than they invested. Risk factors should be taken into account and understood including (but not limited to) currency movements, market risk, liquidity risk, concentration risk, lack of certainty risk, inflation risk, performance risk, local market risk and credit risk.
